Steve,

That is great news! Thanks for checking on that and letting us know how to proceed. We will keep you informed of our schedule for next year for run days and when we get ready to setup annual inspections. Thanks again!

**Thanks,**

**Peter**

Peter and Robby,

I hope you guys had a good time last Saturday but I just couldn't make it. It was a pleasure to meet all of you.

Regarding the meets you and your group would like to have with other hobbyists from out of state. Butch and I agree that as long as the event is private and the public is not involved there is no reason we would need to get involved and insist those visiting units get a state inspection.

That being said, and I think we talked about this, if I were you I would still insist each boiler be pressure tested and documented before running them.

See you guys next year!

Steve,

Thanks for your help and diving right in there with us last Saturday. Also thanks for making sure the document got sent and all the paperwork got filed and invoices sent out. I am not sure about all the other guys, but I got my invoice earlier this week already! I/we look forward to working with you in the coming years and hope that we can continue the discussions we started about how to be able to accommodate other live steam visitors to our railroad.

You said that you live pretty close and if you have a few minutes to come out Saturday, you are welcome to swing by for a few minutes and see how the operation comes together for a public run day. We get there pretty early to start getting ready, but lunch is usually around 11:30am-ish (no earlier for sure) and we start pulling trains promptly at 1pm and run until 4:30pm. We will have a couple of the steamers you inspected as well as a "diesel" or two running that day. If you aren't able or interested, that fine too, I just wanted to extend an invitation to you.

Thanks again for your help.

Thanks,

Peter Craymer
